NEKODI KNIGHT

New York, NY | 516-650-3300 | nekodiknight117@gmail.com | LinkedIn

TECHNICAL SKILLS

Languages: Python, Java, SQL, Bash
Cybersecurity & Compliance: Splunk, Snort, Wireshark, Active Directory, Nmap, RMF, A&A, NIST SP 800-53, DISA STIGs
Frameworks & Tools: FastAPI, React, PyTorch, SQLAlchemy, Pandas, Vite, VSCode, Cursor
Concepts: Risk Assessment, Security Controls, OSI Model, TCP/IP, Client-Server & Data Center Architecture, Incident Response
Certifications: CompTIA Security+ (SY0-701) | CompTIA Network+ N10-009 (in progress)

EDUCATION

Brooklyn College, City University of New York 2026
Bachelor of Science in Information Systems - Magna Cum Laude

PROJECTS

Theme-Trader | AI-Investment Platform | *FastAPI, React, WebSockets, Alpaca API*

- Engineered a real-time AI research pipeline analyzing market volatility, creating data-driven portfolios with 95% less manual data entry.
- Constructed a high-frequency ingestion engine using Alpaca WebSockets for sub-millisecond streaming updates and automated trade execution.
- Built a type-safe ORM layer with FastAPI and SQLAlchemy for efficient database management and data synchronization using uv and Vite.

Swell Scan | AI-Driven Network Intrusion Detection | *FastAPI, PyTorch, JavaScript, Tailwind*

- Designed a full-stack solution using FastAPI, JavaScript, and PyTorch for low-resource network vulnerability detection.
- Developed an API streaming network traffic to an AI model to identify malicious activity across thousands of records with sub-second latency.
- Engineered a PyTorch predictive model extracting high-dimensional traffic features to automatically flag DDoS anomalous patterns.

Built Pandas pipelines to process large traffic datasets and created a responsive React/Tailwind dashboard for simplified user navigation.

PROFESSIONAL EXPERIENCE

Brooklyn College, Brooklyn, NY | January 2026 - May 2026
Teaching Assistant -Intro to Modern Programming Techniques

- Reinforced Java OOP techniques (Inheritance, Polymorphism, Abstraction, Encapsulation) for foundational student understanding.
- Evaluated student code submissions to ensure conceptual understanding and facilitate objective grading.
- Advised students through personalized assignment reviews and hosted exam prep sessions for 40+ students.
- Managed lab operations and grading, enabling instruction on advanced concepts bridging Java fundamentals and data structures/algorithms.

CodePath, New York, NY | January 2026 - May 2026
Cybersecurity Fellow

- Applied Risk Management Framework (RMF) and NIST SP 800-53 security controls to evaluate risk and support A&A workflows.
- Configured Snort IDS and Splunk SIEM to monitor Nginx traffic in alignment with DISA STIG compliance standards.
- Utilized Nmap for network discovery and Wireshark for troubleshooting connectivity and analyzing potential exploits.
- Managed a Linux security architecture, conducting STIG hardening reviews and log correlation to preserve system authorization.

Hospital For Special Surgery, New York, NY | June 2024 - September 2024
End User Support Intern

- Managed 16,000+ user identities via Active Directory, enforcing least-privilege security access control principles.
- Restored 4,000+ workstations during a critical outage by executing disaster recovery protocols compliant with ISO 27001 and HIPAA.
- Resolved enterprise tickets covering Office 365, Windows 10+, and virtualization to maintain high operational uptime. Automated IT asset tracking/deployment for 1,000+ devices, streamlining recovery and continuous patch compliance auditing.
- Participated in patch management cycles and system vulnerability remediation to sustain organizational compliance and reduce endpoint risk.
- Resolved 100+ Tier II technical tickets weekly across Windows and virtualized environments, communicating complex technical resolutions clearly to non-technical stakeholders and medical personnel.
